## **Purpose**

This policy outlines the approach taken by Darwin Institute of Technology (DIT) to ensure a safe and healthy environment for staff, students, contractors and visitors during their participation in work and training activities with the organisation.

It ensures also compliance with the National Code of Practice for Providers of Education and Training to Overseas Students 2018 and The Work Health and Safety (National Uniform Legislation) Act 2011, which is the cornerstone of legislative and administrative measures to maintain and improve occupational health and safety in the Northern Territory.

## **Definitions**

Hazard means any potentially dangerous situation within the work/study environment provided by DIT.

**Incident** means an event or circumstance that leads – or could have lead - to unintended or unnecessary harm during a person's participation in work and/or training activities with DIT.

**Injury** means any incident that causes harm to a person during their participation in work and/or training activities with DIT.

**National Code** means National Code of Practice for Providers of Education and Training to Overseas Students 2018

SRTOs means the Standards for Registered Training Organisations - refer definition of 'Standards'

**Standards** means the Standards for Registered Training Organisations (RTOs) 2015 which can be accessed at <a href="https://www.asqa.gov.au">www.asqa.gov.au</a>

## **Policy**

### 1. Compliance

- Through this policy and related procedure, DIT meets the requirements of the Work Health and Safety Act 2011 (Cth).
- DIT is committed to protecting staff and students from harm to health, safety and welfare through the elimination and/or minimisation of risks arising from work and study.
- DIT will appoint a Health and Safety Representative to liaise with individuals about health and safety matters and thus ensure that the organization is always compliant with health and safety requirements. The representative will be elected once the number of employees exceeds 15. Director of Studies will be carrying out Health & Safety Representative's responsibilities till then.

#### 2. Working safely

- All staff have a responsibility to work safely, take all reasonable care for their own health and safety and always consider the health and safety of others who may be affected by their actions.
- DIT encourages active participation, cooperation and consultation with all staff in the promotion and development of a healthy and safe workplace.
- All staff will receive staff handbook which will include information about workplace health and safety.
   and updated information, if any, will be provided to staff on a regular basis.

### 4. Workplace, delivery site and home office inspections

• All work and training environments will be routinely inspected to identify safety risks, hazards and identify areas for improvement.

#### 5. Hazard identification and risk control

 All staff, students and other individuals are required to report any hazards and safety incidents as soon as they become aware of them. DIT will take immediate actions to respond to incidents, asses risks and control hazards where applicable.

#### 6. Incidents

- Staff and students are expected to immediately report any incidents that occur at work or during training that impact on an individuals' health or safety.
- DIT will respond to, investigate and record all incidents that impact on the health and safety of any individual and will take steps to prevent recurrence

#### 7. Safety records

Records of the organisation's workplace hazards, risks and workplace injuries will be accurately
maintained at all times.

## **Procedures**

## 1. Workplace, delivery site and home office inspections

Pro	ocedure	Responsibility	
<b>A</b> .	<b>Inspections</b> Each worksite will be inspected using the <i>WHS Inspection Checklist</i> at least annually by the respective trainer or by Health and Safety Representative when appointed.	Health and Safety Representative	
•	Staff members working from a home office must conduct this inspection themselves and send their report to the Director of Studies or to Health and Safety Representative when appointed.	Trainer/Assessor	
•	Delivery sites will be inspected by the Trainer/Assessor prior to commencing delivery to ensure it is a suitable site.	Director of Studies	
•	Outcomes of the inspections will be logged on the WHS Inspection Register.		
•	Any hazards identified will be treated according to the below section on hazard control and risk identification.		

### 2. Access to premises procedures

Pro	ocedure	Responsibility
В.	Inspections	Relevant Officer
•	Each staff member must follow access to premises procedure which includes:	
	<ul> <li>Signing in on a register when entering the workplace and signing out when leaving for the day</li> </ul>	Director of Studies
	o Wearing ID	
•	Visitors must be signed in using the register and be provided with a visitor's pass.	
•	Students are to be informed of these requirements at their orientation, so they understand that their safety will be protected at all times.	

## Incident reporting

Pro	ocedure	Responsibility
A.	Workplace incidents	Staff and/or students
•	If an incident occurs in the workplace where there is an injury, an <i>Injury Incident Report</i> must be filled in.	Director of Studies
•	In case of injury or risk of injury, the first person in attendance to a workplace injury should immediately call for help, seeking assistance from Director of Studies (or the Health and Safety Representative when appointed) and an ambulance where needed.	Health & Safety Representative
•	Injury Incident Reports will be used as the basis of an investigation into the incident, if required.	
•	All incidents should also be logged on the Injury Incidents Register.	
•	All incidents are to be assessed for hazards that may lead to the incident recurring.	

### 3. Risk assessment and hazard control

Pro	Procedure Responsibility				
A.	Identify and report hazards				
•	All staff have a responsibility to report hazards in the workplace as they are	All staff			
	identified. Students are also asked to report hazards that they notice.	Health and Safety			
•	All hazards must be reported using the Hazard Identification Report.	Representative			
•	All reported hazards are to be recorded on the Hazard Register.				
В.	Risk assessment	Health and Safety			
•	For all hazards identified, a risk assessment will be conducted to determine the likelihood of someone being exposed to the hazard and the impact of this exposure. The risk assessment is conducted to determine:	Representative			
	<ul> <li>How severe a risk is</li> </ul>				
	<ul> <li>Whether existing control measures are effective</li> </ul>				
	<ul> <li>What action should be taken to control the risk</li> </ul>				
	<ul> <li>How urgently the action needs to be taken.</li> </ul>				
•	Review the information available about the hazard including any available information (including hazard reports, WHS legislation, Australian Standards, code of practice and personal experience).				
•	In considering the risk, use the Risk Rating Matrix (see below) to determine:				
	- Likelihood				
	- Consequences				
	<ul> <li>Risk Level Rating – Critical, Major, Moderate, Minor, Insignificant</li> </ul>				

Pro	ocedure	Responsibility
C.	Control risks and hazards	Director of Studies
•	Hazards should be dealt with in order of priority. Use the Hierarchy of Controls chart (see below) to determine hazard control options. This determines the most effective controls. Risk control measures should always aim as high in the hierarchy as practicable.	Health and Safety Representative, when appointed
•	Urgent action is required for risks assessed as Critical or High Risk. This may include:	
	<ul> <li>Cessation of work, process or activity</li> </ul>	
	<ul> <li>Isolation of the hazard until a permanent solution is determined.</li> </ul>	
•	All hazards must be controlled to ensure staff and students are not injured, do not become ill and there is no damage to property and equipment.	
•	Risks identified through this process must be recorded on the <i>Risk Management Register</i> .	
•	Hazards and their controls must be recorded on the Hazard Register.	

## **Appendices**

## 1. Risk rating matrix

		Likelihood				
		Rare	Unlikely	Possible	Likely	Almost certain
	Catastrophic	Moderate	Moderate	High	Critical	Critical
	Major	Low	Moderate	Moderate	High	Critical
Ses	Moderate	Low	Moderate	Moderate	Moderate	High
Consequences	Minor	Very Low	Low	Moderate	Moderate	Moderate
Cons	Insignificant	Very Low	Very Low	Low	Low	Moderate

## 2. Hierarchy of Controls

1	Eliminate the hazards – remove it completely from the workplace	If this isn't practical then
2	Substitute the hazard – with a safer alternative	If this isn't practical then
3	Isolate the hazard – as much as possible away from staff/students	If this isn't practical then
4	Use engineering controls – adapt tools or equipment to reduce the risk	If this isn't practical then
5	Use administrative controls – change work practices and organisation	If this isn't practical then
6	Use Personal Protective Equipment (PPE) – this should be the last option after you have considered all the other options for your workplace	If this isn't practical then
